TamaPoke

Your pocket Pokémon friend!

How to look after it, play with it and help it grow.

This TamaPoke belongs to: _____

A fan-made toy. Pokémon is a trademark of Nintendo / Game Freak / The Pokémon Company.

Meet your TamaPoke

A little Pokémon lives inside your TamaPoke. It gets **hungry**, **sleepy** and **dirty**, just like a real pet. Look after it and it grows up, evolves and battles!

The button on the side (PWR)

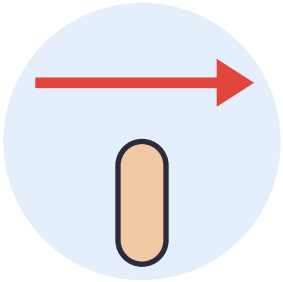

Press it once to switch the screen off or on. Your Pokémon keeps living, even when the screen is dark.
Hold it for 2 seconds to switch the TamaPoke off completely. When you switch it on again, your Pokémon has been waiting for you.

Use your finger on the screen

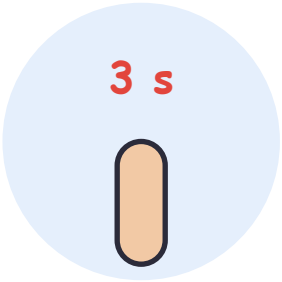

TAP

Touch the screen and lift your finger. Like pressing a button.

SWIPE

Slide your finger up, down, left or right to go to another screen.

HOLD

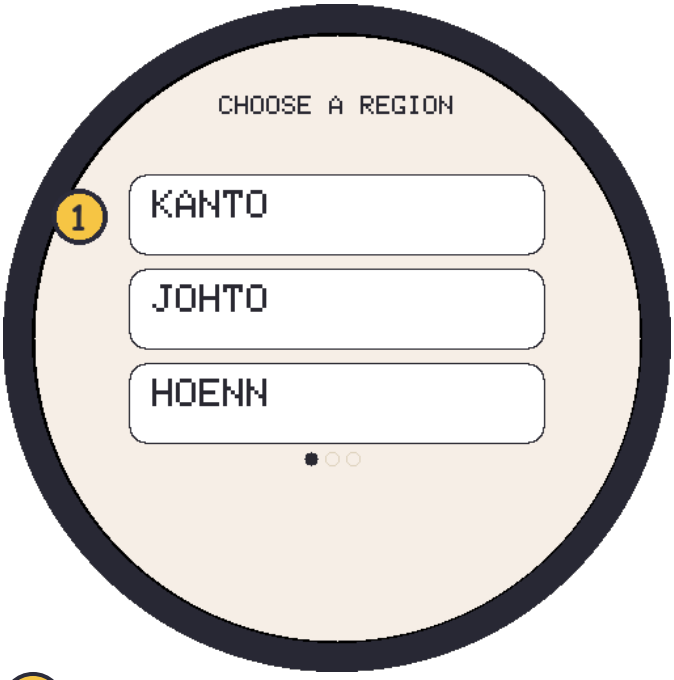

Keep your finger on your Pokémon for 3 seconds (only to set it free).

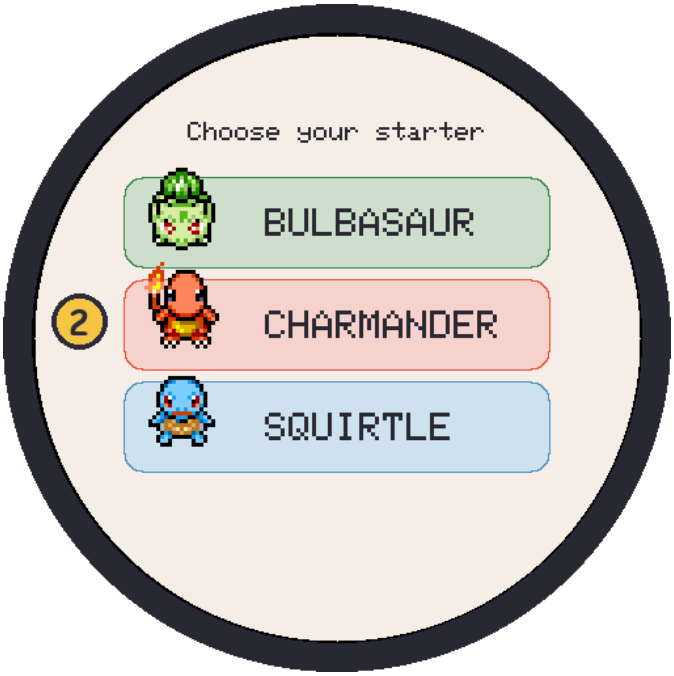

Charging

The little battery at the top of the screen shows how much power is left. When it is low, plug the USB cable into the TamaPoke. A grown-up can help.

Starting a new game

The very first time, the TamaPoke asks you two questions.

1. **Choose a region.** That is the world your Pokémon comes from. **KANTO** is the first one, a good place to start.

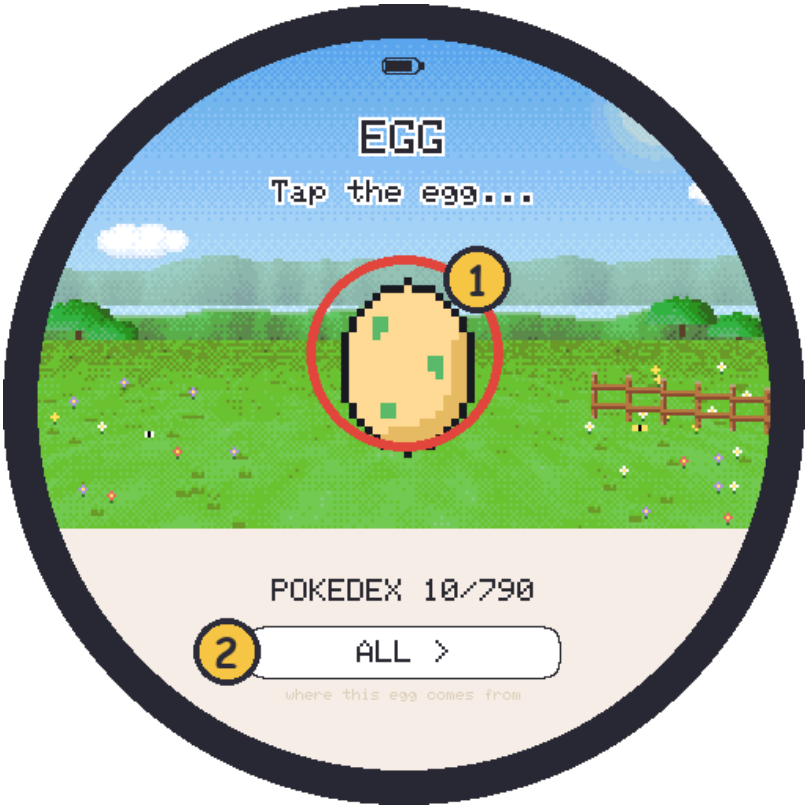

2. **Choose your first Pokémon** by tapping it. It will be your friend from now on!

Good to know

Can't decide? There is no wrong choice. Every Pokémon can grow strong.

The egg

New Pokémon come out of eggs. You never know who is inside!

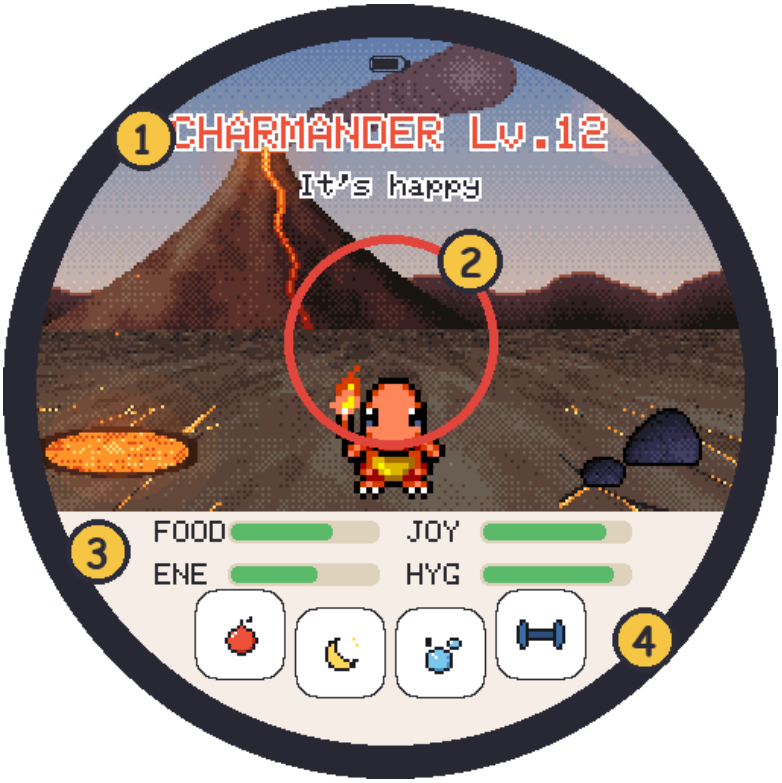

1. **Tap the egg 3 times** to help it hatch. It wiggles... and out comes a new friend!
2. This button chooses **which region** the egg comes from. Tap it to change.

Good to know

The egg **waits for you**: it only hatches when you tap it, so take your time. Some eggs are rare, and a very, very few hide a **shiny** Pokémon with special colours. When one of your Pokémon grows up and leaves, a new egg arrives.

The main screen

This is home. Your Pokémon lives here.

1. Its **name and level**. Tap here to open the **MENU**.
2. Your **Pokémon**. Tap it to **give it a cuddle**. It loves that!
3. Its **four bars**: what it needs (see below).
4. The **four buttons**: food, light, bath and training.

FOOD
Is it hungry? Give it a berry.

JOY
Is it happy? Cuddle it and play.

ENE
Energy. Is it tired? Let it sleep.

HYG
Is it clean? Give it a bath.

Good to know
Green bars are good. When a bar goes **yellow or red**, your Pokémon needs you! The words under its name also tell you how it feels.

Taking care of it

Tap the **apple button** to open the food. Tap one to give it to your Pokémon.

1. **Red berry**
2. **Blue berry**
3. **Green berry**
4. **Candy**: yummy, but not too many!

5. The **moon button** turns the light off: your Pokémon goes to **sleep** and gets its energy back. Tap it again to wake it up.
6. The **bubble button** gives a **bath**. It cleans up the poops too!
7. **Tap your Pokémon** to cuddle it.

Good to know

Each Pokémon has a **favourite berry**. Try them all: when it gets the one it loves, a heart appears! At night, if you switch the screen off, it goes to bed by itself.

Training

Tap the **dumbbell button** to train your Pokémon and make it stronger for battles.

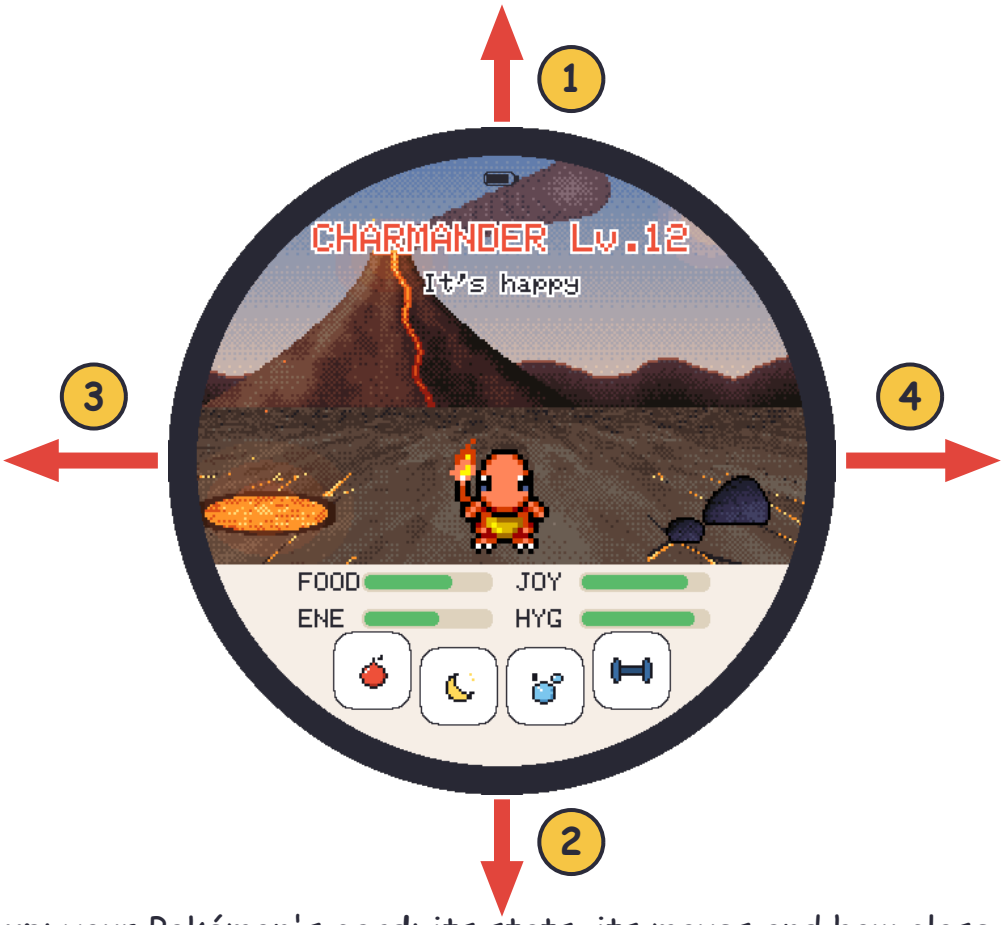

1. **STRENGTH**: hit the punching bag as fast as you can!
2. **SPEED**: targets pop up. Tap them quickly before they vanish!
3. **DEFENCE** grows all by itself when your Pokémon is happy and cared for.

Good to know

Training makes your Pokémon a little tired and hungry. Give it a snack and a nap afterwards!

Swipe to explore

From the main screen, swipe your finger to visit the other screens.

1. **Swipe up**: your Pokémon's **card**: its stats, its moves and how close it is to evolving.
2. **Swipe down**: **your trainer card**: badges, stickers and your name.
3. **Swipe left**: the **gyms**, to battle!
4. **Swipe right**: your **party**, the Pokémon friends you have collected.

its stats

its moves

Growing up

Your Pokémon grows a little bit every hour, even when the screen is off.

Levels

It gains **one level every hour**. The higher the level, the stronger it is.

Evolving

When it is ready, your Pokémon wants to **evolve** and becomes a new Pokémon! You can say **Evolve** or **Keep form**. It can only evolve when all its bars are good, so look after it well.

New moves

Sometimes it **wants to learn a new move**. Pick an old move to forget, or tap **Do not learn**.

Saying goodbye

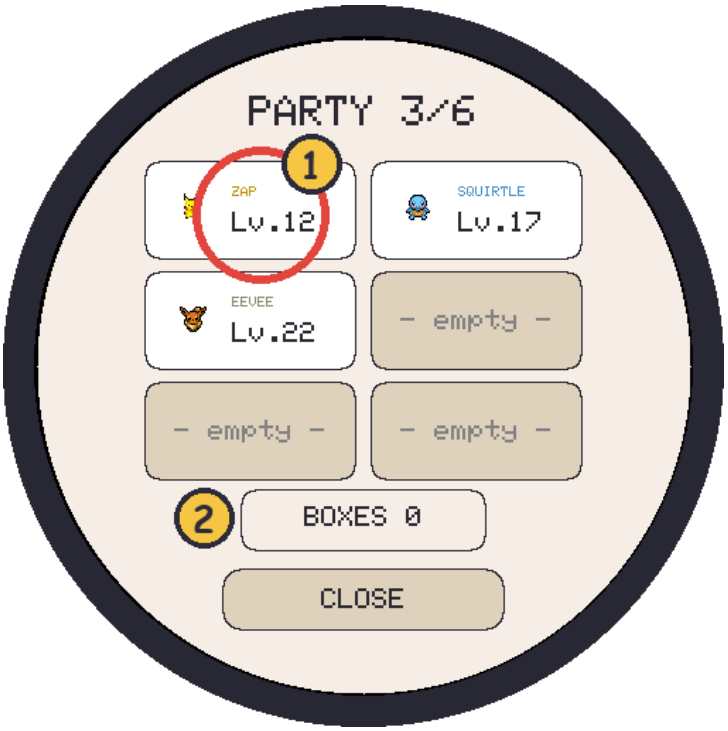

After about **3 days** it is all grown up and **wants to tell you something**. If you say **Goodbye**, it joins your **party** (it is not lost!) and a **new egg** arrives. You can also say **Stay together**.

Careful!

If nobody looks after it for a long time, a sad Pokémon can **run away**. In **kid mode** (ask a grown-up) it never runs away.

Your party

Every Pokémon that said goodbye lives here. You can keep up to 6; all the others wait in the BOXES.

1. **Tap a Pokémon** to see it, hear its cry and look at its moves.
2. The **BOXES** hold every other Pokémon you have, as many as you like. On a Pokémon's page, **TO BOX** sends it there.

Good to know

Your party Pokémon can **battle with you**! The more Pokémon you raise, the stronger your team.

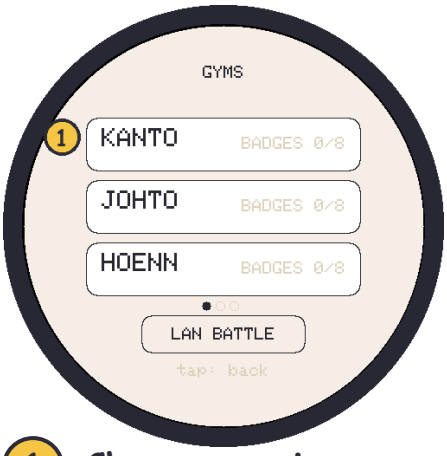

They grow by fighting!

Every Pokémon in your party gets **XP** when you win a battle or catch a Pokémon, even the ones that did not fight. Enough XP and they **gain a level**, and sometimes **evolve**! They can never grow higher than the best level you reached by raising one.

Battles

Swipe left from the main screen to go to the gyms. Beat all the leaders to win their **badges**!

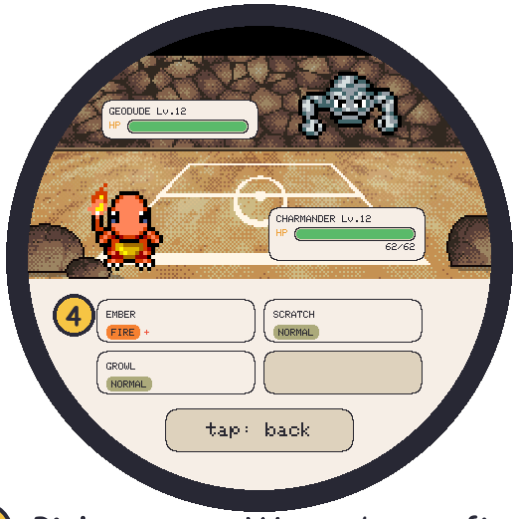

1. **Choose a region**.

2. **Choose a leader**. Start with the first one: the next one opens when you win. **EASY** or **HARD**: start with easy!

3. Choose your team, then in the battle tap **FIGHT** to attack, **POKEMON** to change Pokémon, or **RUN** to leave.

4. **Pick a move**. Water beats fire, fire beats grass, grass beats water... Try and see which moves are "super effective"!

5. **You win!** You get a new **badge** and your Pokémon gets stronger.

Exploring

Wild Pokémon hide all over the island. Go and find them!

1. Tap your Pokémon's name to open the **MENU**, then tap **EXPLORE**.
2. The **balls** show how many times you can explore. You have **3**.
3. **Choose a place** on the map: meadow, forest, beach, ocean, mountain, snow, cave or volcano. Each one has its own Pokémon!
4. **Watch closely!** One hiding place **moves**. Tap it quickly... a wild Pokémon jumps out!
5. To go back, tap the **arrow** next to the title.

the ocean

the volcano

Good to know

The balls come back by themselves: all 3 in **10 hours**, or in **2 hours while your Pokémon sleeps**. Sometimes a wild Pokémon gets scared and **runs away**, but now you have seen it! Pokémon you have never seen are easier to find.

Catch them!

A wild Pokémon appeared! Battle it and try to catch it.

1. Tap **BALL** to throw a ball. Tap **FIGHT** first to make it weaker: a weak Pokémon is much easier to catch!

2. **Gotcha!** It is yours. It goes into the **BOXES**, and into the **Pokédex**.

3. Open the **BOXES** from the menu. The buttons at the top sort them (**ARRIVAL** or **N.**) and show one **region** or one **type** at a time.

4. Tap a Pokémon in the boxes: **TO TEAM** brings it into your team. Team full? Then **choose who goes to the boxes** in its place.

5. While an **egg is waiting**, you can **ADOPT** a Pokémon from the boxes instead: tap it twice. It starts a new life at **level 1** and grows up with you. The egg goes away!

Good to know

If the ball does not work, the wild Pokémon attacks: try again! But if you knock it out, it is gone. Rare Pokémon are harder to catch.

The Pokédex

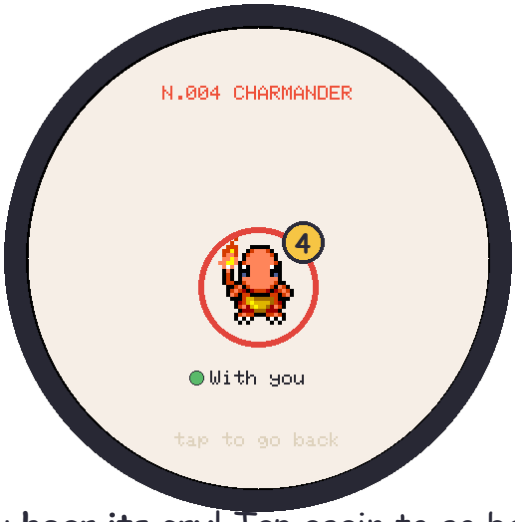

The Pokédex is the book of all the Pokémon you have met. Can you fill it?

1. Tap your Pokémon's name to open the **MENU**, then tap **POKEDEX**.
2. **Choose a region.**
3. Pokémon you have met are in colour. The black shadows are the ones still to find! *A* **Pokéball** means one is in your boxes, a **green dot** that one is with you. **Tap one** to see it. *A* **number in a frame** has no picture yet: it cannot be found, and it does not count.
5. The **TYPES** button shows one type at a time: tap its left side to go back, its right side to go on.

4. You see it big, and you **hear its cry**! Tap again to go back.

The quiz: who's that Pokémon?

Listen to a cry, look at a shadow... and guess who it is!

1. In the Pokédex, tap **QUIZ** at the bottom of the region list.
2. **Tap the shadow** to hear the cry again.
3. **Tap the right name**. Green means right! Then tap again for the next one.

4. After **10 questions** you get **stars**: 1 star for 5 right, 2 stars for 8, and **3 stars for all 10**. Stars make your Pokémon stronger!

Good to know

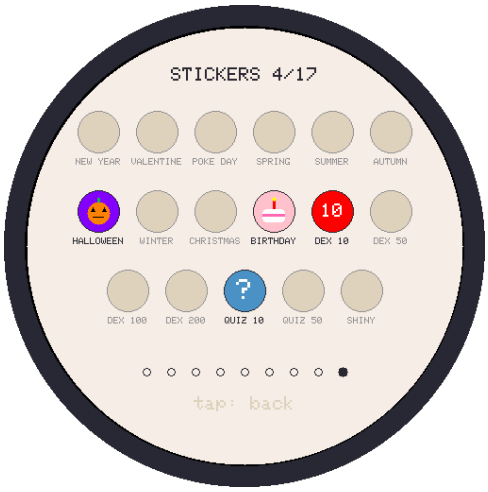

There are 10 questions each day. Come back tomorrow for more!

Your trainer card

Swipe down from the main screen. Swipe left and right to turn the pages. Tap your name (by the **pencil**) to change it.

your badges

your stickers

Special days (collect the sticker!)

1 January	New Year: more shiny eggs
14 February	Valentine's Day
27 February	Pokémon Day
20 - 26 March	Spring
21 - 27 June	Summer
22 - 28 September	Autumn
25 - 31 October	Halloween
21 - 23 December	Winter
24 - 26 December	Christmas

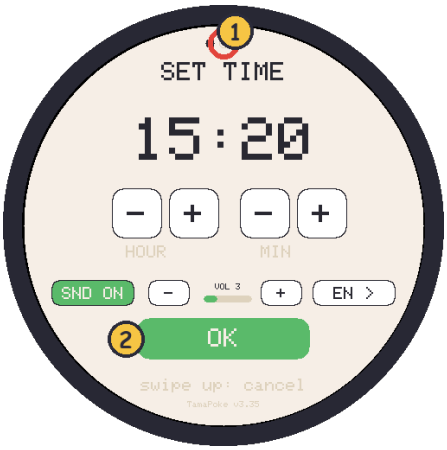

Your birthday!

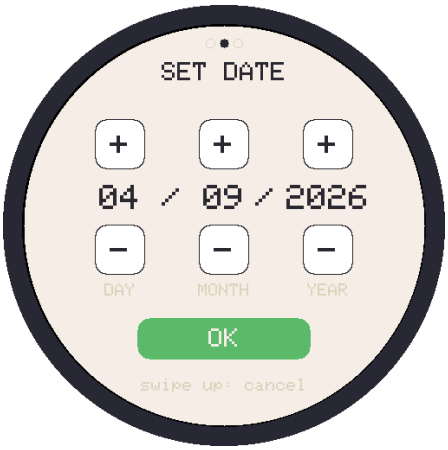

On your birthday a **present** waits on the screen. **Tap it** to open it: a **shiny Pokémon** joins your party! (A grown-up sets the date in the settings.)

For grown-ups: settings

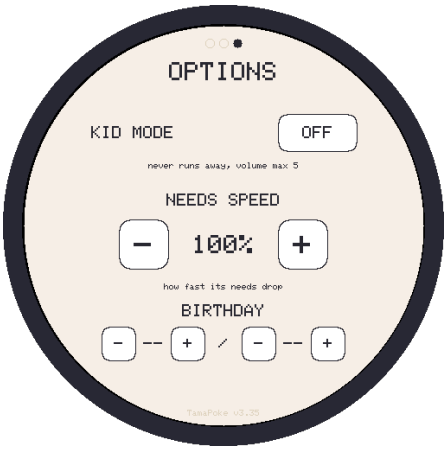

Open the MENU (tap the name) and choose **SETTINGS**. There are three pages: swipe left or right, or tap the dots at the top. Swipe up to leave without saving.

time, sound, language

date

options

1. The **dots** show which page you are on.
2. **OK** saves the time and the date.

KID MODE

The Pokémon **never runs away**, its needs never drop below 20 while awake, and the volume is capped at 5 of 10.

NEEDS SPEED

How fast hunger, energy and the rest go down: 25%, 50%, 75% or 100%. At 50% the needs fall half as fast. Growing up is not affected.

Date and birthday

Set the **real date** on the second page: special days and the **birthday** (OPTIONS page, day / month) only work with the right date.

Help!

The screen is black.

Press the side button once. If nothing happens, the battery may be empty: charge it.

I can't feed it, the buttons are grey.

It is probably asleep. Tap the moon button to wake it up.

There is no sound.

Settings: check that the sound is ON and the volume is not 0.

My Pokémon is only a number, there is no picture.

The pictures live on the memory card (SD). A grown-up can put them back with the installer.

My Pokémon is gone!

If it said goodbye, it is in your party (swipe right). A new egg is waiting for you.

The time or the date is wrong.

Settings: set the time on page 1 and the date on page 2, then OK.

How do I trade a Pokémon?

Open the **MENU** and tap **TRADE** on both TamaPoke. One taps **HOST**, the other **JOIN**. Each one then picks a Pokémon, and when **both** tap OK they swap. Some Pokémon evolve when they are traded!

I can't explore any more.

The balls on the map are empty. Wait a bit: they come back by themselves, even faster while your Pokémon sleeps.

For grown-ups

Pokémon caught while exploring are kept in a Pokédex box on the device itself, not on the SD card; the save backup (EXPORT on the serial console) includes them. The firmware, the installer and the full rules are on the project page. The Pokémon pictures and cries are optional packs copied to the microSD card by the web installer; without the cries, the TamaPoke plays its own little beeps instead. A new device starts at volume 3.
